POWERTECH DIESEL | IDAHO FALLS

EZ LYNK AUTO AGENT 3 SETUP & TUNE INSTALL GUIDE

The complete, current guide for the Auto Agent 3: connect it, lynk it to Powertech Diesel, fetch your tunes, and install them safely. This replaces the old Auto Agent 2 sheet.

LYNK POWERTECH AT
ezlynktuner@protonmail.com

TIME NEEDED
About 15–30 minutes for a first flash

DEVICE
Auto Agent 3 only (not the Auto Agent 2)

The Auto Agent 3. One compact unit with the OBD-II plug built right in, so there is no separate cable box like the old Auto Agent 2. Image: EZ LYNK (ezlynk.com).

WHAT IS DIFFERENT ON THE 3

- **Built-in OBD-II plug:** plugs straight into the port under the dash.
- **USB-C port and microSD slot** on the unit for service and support.
- **Stronger Wi-Fi:** your phone or tablet joins the Auto Agent's own Wi-Fi network to talk to the Auto Agent app.
- **Two status lights:** green means power, blue means its Wi-Fi is broadcasting.
- **Automatic firmware updates** through the app. Let them finish before you flash.

DO NOT USE THE OLD GUIDE: The old sheet and its screenshots show the Auto Agent 2. The screens, the cable, and the lynk email on that sheet are out of date. Follow this guide only, and lynk to the ProtonMail address above.

BEFORE YOU START

1. Charger on

Put a battery charger on the truck and leave it on for the whole flash. Low or dropping voltage during an install can corrupt the flash.

2. Parked & off

Park safely, with accessories, lights and HVAC off. You will turn the key to RUN, engine OFF, in Step 2.

3. Phone ready

Phone charged, with cell data or Wi-Fi nearby. You need internet to create your account, lynk, and download tunes.

4. Time to finish

Do not start a flash you cannot finish. Never unplug the device, close the app, or cycle the key except when the app tells you to.

CONNECT & LYNK

Steps 1–5 | Auto Agent 3

1 GET THE APP & MAKE YOUR ACCOUNT

Download the free **Auto Agent app by EZ LYNK** from the App Store or Google Play. Open it, **create your account**, and tap the confirmation link EZ LYNK emails you.

If the app offers a **firmware or app update**, let it finish now, not in the middle of a flash.

YOU NEED

Phone / tablet	**iOS 15+ or Android 6.0+**
App	**Auto Agent (EZ LYNK)**
Internet	**Cell data or Wi-Fi**

2 PREP THE TRUCK: CHARGER ON, KEY TO RUN

Hook up the **battery charger** and leave it connected. Turn the key to **RUN with the engine OFF** so the truck computer wakes up. Push-button start: press Start **without** your foot on the brake until the dash lights up.

CHECK

Charger	**On & connected**
Key	**RUN**
Engine	**OFF**

3 PLUG IN THE AUTO AGENT 3

Plug the Auto Agent 3 **straight into the OBD-II port** under the dash on the driver side. On most trucks there is no cable in between (see the 2018+ Ram note below). Watch the lights on the unit.

> **2018+ Ram 2500/3500 6.7L Cummins:** you also need EZ LYNK's Security Gateway (SGM) bypass cable made for the Auto Agent 3 (EZ LYNK part 100EE00C23). The Auto Agent 2 SGM cable (100EE00C09) does not work on the 3. Ask Powertech if you are unsure.

STATUS LIGHTS

Green solid	**Power on**
Blue solid	**Wi-Fi ready**
Green only	**Unplug, replug**

4 CONNECT YOUR PHONE TO THE AUTO AGENT 3

Open your phone's **Wi-Fi settings** and join the network named **EZLYNK_** followed by your device's serial number (for example EZLYNK_1234). Then return to the app. It should show your truck as **Connected** and read the VIN.

> Your phone will warn that the EZLYNK network has **no internet**. That is normal. That network only talks to your truck. Stay connected to it while you work in the app.

WI-FI LIST: PICK THIS

Home Wi-Fi	
EZLYNK_####	**Connected**
Neighbor Wi-Fi	

5

LYNK YOUR TRUCK TO POWERTECH DIESEL

In the app: open the menu, tap **Vehicle**, then **Technicians**, then the **+** in the top-right corner. Lynk to:

TECHNICIAN: POWERTECH DIESEL

ezlynktuner@protonmail.com

If the app asks about modifications on your truck, list them and tap Done. Lynking needs internet, so a phone should have cell data on.

When it works, **Powertech Diesel** shows under **Lynked With**. Then let Powertech know you are lynked. Your tunes are sent to your account after that, usually during shop hours.

IN THE APP

Menu	**Vehicle**
Then	**Technicians**
Tap	**+ (top right)**

FETCH, INSTALL & AFTER

6 FETCH YOUR TUNES IN ECU PROFILES

In the app menu, tap **Vehicle**, then **ECU Profiles**. Tunes Powertech sent you appear here. Tap the **cloud (fetch) icon** next to a tune marked **Available for Fetching** to download it.

> Downloads need internet: phones use cell data while staying on EZLYNK Wi-Fi. Wi-Fi-only tablets: download on normal Wi-Fi first, then reconnect to EZLYNK_#### to install.

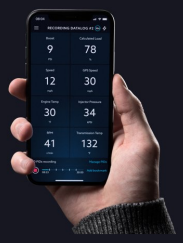

ECU PROFILES	
Your tune file	**Available for Fetching**
Tap	**Cloud / fetch icon**
Then it shows	**Ready to Install**

7 INSTALL THE TUNE: FOLLOW EVERY PROMPT

Tap the tune, then **Install**. The app walks you through **key ON / key OFF** steps. Follow them exactly and wait for **Installed**.

Unlock or reset file first: if Powertech sent a file labeled unlock, reset, or MUST FLASH FIRST, install that one before any tune file.

> **During the flash:** do not unplug the Auto Agent 3, start the engine, or close the app. Keep the charger on until the app says complete. If a firmware update was interrupted, unplug, replug, and let it finish first.

The current Auto Agent app, recording a datalog. Image: EZ LYNK (ezlynk.com).

AFTER THE INSTALL

- **Leave it plugged in:** it is your gauges, code reader, and datalogger.
- **Watch live data** in the app (tiles, gauges, or graphs) and read or clear diagnostic codes there too.
- **Send a datalog if Powertech asks:** record a log in the app and it shares straight to Powertech through the cloud. You can also message Powertech in the app on the lynked vehicle.

TROUBLESHOOTING

PROBLEM	FIX
Only the green light is on	Unplug the Auto Agent 3, plug it back in, and wait for the blue light. The key must be in RUN.
App says Not Connected	Confirm you are on the EZLYNK_#### Wi-Fi, then close and reopen the app.
No tunes in ECU Profiles	Not lynked yet, or Powertech has not sent them. Check Lynked With (Step 5) and let the shop know.
Install stuck at 0%	The download may be incomplete. Unplug the unit, get on a good internet connection, fetch the tune again (cloud icon), plug back in, and retry the install.

STILL STUCK?

Check the charger, the key in RUN, the blue light, and the lynk. Most problems are one of those four. If your tunes still do not show up, call Powertech Diesel at 208-542-7793 and mention you lynked to ezlynktuner@protonmail.com.

Powertech Diesel · 2968 N Boeing Street, Idaho Falls, ID 83401 · 208-542-7793 · Mon–Thurs 9:00–6:00 PM, Fri 9:00–5:00 PM MT. EZ LYNK and Auto Agent are trademarks of EZ LYNK. Guide updated November 2026.
